EDUCATION

Masters' Degree: Applied Math and Data Science

FGV EMap School of Applied Mathematics

Mar 2024 – Present

Cumulative GPA: 3.57/4.0

- Expected Graduation: May 2026
- Advisor: Prof. Dário Oliveira.

Bachelor's Degree: Data Science and Artificial Intelligence

FGV EMap School of Applied Mathematics

Feb 2020 – Dec 2023

Cumulative GPA: 8.8/10

PROFESSIONAL EXPERIENCE

École Normale Supérieure (ENS Paris)

Research Intern (Département d'Informatique)

March 2026 – June 2026

Paris, France

- Conducting theoretical research on inductive biases in Transformer architectures, with emphasis on representation learning and generalization in high-dimensional settings.
- Investigating the statistical and computational impact of different encoding schemes (e.g., sinusoidal, learned embeddings) using high-dimensional statistics and asymptotic analysis.

FGV EMap Green AI Lab

Research Assistant

Jan 2024 – Present

Rio de Janeiro, Brazil

- Conducting research in deep learning for climate and agricultural sustainability using geospatial satellite.
- Developing a Master's project on soil parameter estimation from hyperspectral imagery data, with applications to environmental monitoring and agriculture.
- Studying how deep learning models capture structure in geophysical data, with focus on interpretability and robustness.
- Applying Large Language Models (LLMs) to real-world problems, including decision-support tools and automated question generation.

FGV IBRE Brazilian Institute of Economics

Intern in Data Science (Innovation Superintendency)

July 2023 – Feb 2024

Rio de Janeiro, Brazil

- Contributed to an Artificial Intelligence study group, teaching concepts related to Transformer-based models.
- Applied NLP techniques and Transformer models to classify news articles and products, enhancing analysis and categorization processes.

CAPSTONE Partners Gestão de Recursos

Intern in Data Science (Macroeconomic Research)

June 2022 – Apr 2023

Rio de Janeiro, Brazil

- Developed detailed macroeconomic reports covering various regions, focusing on Europe and the United States.
- Utilized web scraping techniques to gather data on Brazilian economic indicators and specific countries' inflation metrics.
- Conducted macroeconomic research, including analysis of the U.S. labor market and the impact of temperature variations on gas consumption in Europe.

TEACHING EXPERIENCE

FGV EMap School of Applied Mathematics

Teaching Assistant

Feb 2022 – Dec 2025

- Neural Networks and Deep Learning (Graduate, 2025)
- Deep Learning (Undergraduate, 2023, 2024)
- Numerical Linear Algebra (Undergraduate, 2022)

FGV EPGE Graduate School of Economics

Teaching Assistant

Aug 2022 - Dec 2022

- Introduction to Applied Data Science for Economics (Graduate, 2022)

EXTRACURRICULAR ACTIVITIES

CNPq – National Council for Scientific and Technological Development

Aug 2020 – Aug 2022

Undergraduate Research Fellow (PICME)

- PICME is a highly competitive national program that offers advanced mathematical training to undergraduate students who excelled in the Brazilian Mathematics Olympiads (OBMEP/OBM medalists).
- Through a CNPq scientific initiation fellowship, selected students join graduate-level mathematics courses while completing their undergraduate studies.
- The program supports only the top-performing students in the country and provides early immersion in research and advanced theoretical training.

FGV+ Social Impact Initiative

Mar 2021 – Dec 2022

Volunteer

- Led four consulting projects for NGOs supporting low-income families in Rio de Janeiro.
- Developing financial literacy tools and organizing budget strategies for these organizations.

AWARDS

- **CAPES Graduate Fellowship:** Full tuition coverage and monthly stipend awarded by the Brazilian Ministry of Education (2024–Present).
- **FGV CDMC Merit Scholarship:** Full undergraduate tuition waiver awarded for outstanding performance in National Mathematics Olympiads (2020–2023).
- **Brazilian Public School Mathematics Olympiad (OBMEP):** 1 Gold (2016), 1 Silver (2019), 3 Bronze (2014, 2015, 2017).
- **São Paulo Mathematics Olympiad (OPM):** 2 Silver (2015, 2016).
- **Summit of AI in Latin America Hackathon (SALA 2026):** Honorable Mention with team *AquaLens* for automating fish species counting in underwater videos using computer vision.

ADDITIONAL INFORMATION

- **Programming Languages:** Python, R, Matlab, JavaScript.
- **Languages:** Portuguese (Native), English (Advanced – TOEFL iBT: 98/120, Oct 2025).
